

ScrapBees GmbH
Stettiner Straße 1
41460 Neuss

Fullstack-Developer (m/w/d)

We are...

We are a startup, founded in mid-2020, focusing on disrupting the metal-recycling industry. By rethinking recycling, focusing on convenience, we strive to access the yet untapped urban mines. From customer acquisition to our own logistics to metal sales, everything is under our control. Our custom software ensures that the material intake is as efficient as possible, the material finds the perfect recycling-partner and our virtual scrapyard is constantly monitored.

Team play is essential and our successes fuel our hunger for further expansion. Everyone takes responsibility, no matter where in the company.

You are...

- ...proficient in working with web-technologies
 - (our tech-stack: React (native), node, MySQL, +AWS-technologies)
- ...happy to write dirty untested code to deliver a proof of concept
- ...even happier when you can migrate the poc to a sustainable, unit- and e2e-tested project
- ...willing to take part in the dynamic of a quickly growing start-up
- ...resilient, because no established development process exists (yet)

Your responsibilities

- Extend and maintain our logistics-software
- Help us improve our internal processes (internal tools)
- Flexible working hours, home-office possible

Interested?

Then please tell us who you are and what you worked on so far.

Send your application to mitmachen@schrottbienen.de

Happy to meet you!
Your **ScrapBees**
